

THE STONE INDUSTRY

BIANCO DOLOMITI (DOLOMITE)

Polished finish pictured

DESCRIPTION

Smooth white background with wisps of grey.

SIZE

Slab

THICKNESS

1.8 CM ($\frac{5}{8}$ "

FINISH

Polished

APPLICATION

Commercial/Residential Interiors

Vertical/Horizontal

Countertops

CARE + CLEANING

- Clean stone surfaces with a neutral cleaner, stone soap, or a mild liquid dishwashing detergent and warm water.
- An excessive concentration of cleaner or soap may leave a film and cause streaks. Follow manufacturer recommendations.
- Rinse the surface thoroughly after washing with the soap solution and dry with a soft cloth.

DEFINITION

Dolomites generally have higher densities, lower absorptions, greater compressive and bending strengths, and higher abrasion resistance than the calcium carbonate based limestones. These property differences offer some application choices for dolomites where other limestone varieties are marginal or unsuitable performers. *From Natural Stone Institute.*
